MOBILE APP FOR PASSENGER

Helping them on every step of their journey

Connect the people with disabilities directly with service providers

Allowing request assistance and communication between them in real time

Alert the service provider to the disabled's imminent arrival in order to send an employee to assist him

assistant
airport

HOW DOES IT WORK?

Using a combination of mobile and location based technologies

1 Passenger requests assistance through the Assistant Airport mobile app

Passenger

2 All assistance requests go to the centralized database of Assistant Airport

4 An agent is dispatched along with any needed equipment to the passengers' actual location

Agent

Coordinator

assistant airport

3 Passenger arrives at the airport, previewed on map and an automated Assistant alert is sent to the Station

The entire process is tracked and monitored on every step
